

Pre-solo Written Exam

Name: _____ Date: _____

Airplane Make/Model: _____

Answer the following questions in the space provided, using the FARs, AIM, AFD, and POH. If you reference one of these sources for an answer, be sure to note it for your future reference.

What type of engine does the aircraft have? _____

What is the engine horsepower? _____

How many gallons of useful fuel does the aircraft hold? _____

What type of oil should be used in this engine? _____

What type of coolant is in the aircraft? _____

Please define in your own words and list the speed for each of the following in the aircraft:

Vr _____

Vx _____

Vy _____

Best Glide _____

Vne _____

Vno _____

Va _____

Vfe _____

Vs1 _____

Vso _____

What is the maximum demonstrated crosswind component for the aircraft?

What is the service ceiling of the aircraft? _____

What is the distance to clear a 50 foot obstacle on a standard day?

What is the landing distance over when landing over a 50 foot obstacle on a standard day? _____

What is the maximum RPM setting? _____ For how long? _____

Please describe the loss of engine procedures for the aircraft.

What is the maximum gross weight of the aircraft? _____

What is the empty weight of the aircraft? _____

What is the useful load of the aircraft? _____

With full fuel, how much weight can you carry in the aircraft? _____

What preflight actions are required before a flight not in the vicinity of an airport? _____

Before any flight? _____

List the minimum equipment and instruments that must be working properly in your aircraft for flight. _____

How many hours are required between consuming alcohol and flying? _____

What is the maximum blood alcohol content to legally operate an aircraft? _____

What are the weather minimums, as defined on your solo endorsement?

What altitude should you fly when operating in level cruising flight at more than 3,000 feet agl? -----

Why is it necessary to drain fuel from the fuel sumps? When should this be done? -----

What type and grade of fuel is used in the aircraft? -----

How do you check the oil level in the aircraft? -----

Will the engine run with the master switch turned off? Why?

What is the maximum allowable flap setting for takeoff in the aircraft?

What documents and endorsements are you required having in your possession to legally operate the airplane as a student pilot?

Do you need your logbook in your possession when you fly solo? Why/Why not? -----

During a magneto check, what is the maximum RPM drop? -----

Draw a runway and a traffic pattern and label each leg.

Which turn direction is standard for a traffic pattern? _____

How do you enter and exit the traffic pattern at an uncontrolled airport?

Describe "Wake turbulence". _____

In which type of aircraft and in which configuration is this most prominent?

What is proper procedure to avoid wake turbulence?

When are you required to wear a safety belt? Shoulder harness?

What must a pilot do before entering Class D airspace?

What is the minimum altitude you can fly anywhere? _____

Over congested areas? _____

Over other than congested areas? _____

Over sparsely populated areas or open water? _____

List the documents that must be aboard the aircraft at all times.

Who has the final authority and responsibility for the operation of the aircraft when you are flying solo? _____

Can you operate in Class B airspace as a student pilot? _____

What is the minimum fuel requirement for VFR day conditions?

If the altimeter setting is not available at an airport, what setting should you use before departing on a local flight? _____

What are the additional limitations on your solo endorsement?

What are the limitations of a student pilot, as stated in Part 61.89 of the Federal Aviation Regulations? _____

What must you do before practicing maneuvers?

When practicing Steep Turns, Stalls, and Slow Flight, the entry altitude must allow a recovery to be completed no lower than _____feet agl.

When two aircraft of the same category are converging head-on, which way do you turn to avoid the other aircraft? _____

Give three situations that would necessitate a go-around.

List the procedure for a go-around.

Instructor _____

Student Signature _____

Instructor Signature _____

Date of Review/Logbook Endorsement _____
